## INTRODUCTION

At the suggestion of the Subcommittee on Internal Flow, the National Advisory Committee for Aeronautics has assembled this bibliography on air inlet and internal flow data for aircraft.

It was felt that the purpose of this publication, to furnish the engineer and researcher with a listing of theoretical and experimental studies related directly and indirectly to the field of internal flows, could be served best by presenting some of the more pertinent and interesting references. Thus this bibliography is not complete in its listing of internal flow reports from the NACA or from other sources. The works referenced here are, for the most part, those published before January 1948.

To aid the investigator in finding references, the bibliography has been indexed according to subject matter. NACA reports and reports from other sources are grouped separately. The subject breakdown used may be found in the table of contents on the preceding pages.

## A E R O D Y N A M I C S

FUNDAMENTAL AERODYNAMICS

## COMPRESSIBLE FLOW

## Subsonic Flow

- Lees, Lester: A Discussion of the Application of the Prandtl-Glauert Method to Subsonic Compressible Flow over a Slender Body of Revolution. NACA TN No. 1127, September 1946.
- Gothert, B.: Plane and Three-Dimensional Flow at High Subsonic Speeds. NACA TM No. 1105, October 1946.
- Hess, Robert V., and Gardner, Clifford S.: Study of the Prandtl-Glauert Method of Compressibility Effects and Critical Mach Number for Ellipsoids of Various Aspect Ratios and Thickness Ratios. NACA RM No. L7B03a, March 1947.
- Bilharz, H., and Holder, E.: Calculation of the Pressure Distribution on Bodies of Revolution in the Subsonic Flow. Part I - Axially Symmetrical Flow. NACA TM No. 1153, July 1947.
- Smith, Norman F.: Numerical Evaluation of Mass-Flow Coefficient and Associated Parameters from Wake-Survey Equations. NACA TN No. 1381, August 1947.
- Schafer, Manfred: Equations for Adiabatic but Rotational Steady Gas Flows without Friction. NACA TM No. 1187, August 1947.
- Turner, L. Richard, Addie, Albert N., and Zimmerman, Richard H.: Charts for the Analysis of One-Dimensional Steady Compressible Flow. NACA TN No. 1419, January 1948.

## Mixed Flow

- Fossel, W.: Flow in Smooth Straight Pipes at Velocities above and below Sound Velocity. NACA TM No. 844, January 1938.
- Kaplan, Carl: The Flow of a Compressible Fluid Past a Curved Surface. NACA Report No. 768, 1943.
- Bergman, Stefan: On Supersonic and Partially Supersonic Flows. NACA TN No. 1096, December 1946.
- Ackeret, J., Feldmann, F., and Rott, N.: Investigations of Compression Shocks and Boundary Layers in Gases Moving at High Speed. NACA TM No. 1113, January 1947.
- Gothert, Bernard H., and Kawalki, K. H.: The Calculation of Compressible Flows with Local Regions of Supersonic Velocity. NACA TM No. 1114, March 1947.
- Kantrowitz, Arthur: The Formation and Stability of Normal Shock Waves in Channel Flows. NACA TN No. 1225, March 1947.
- Eggink: Compression Shocks of Detached Flow. NACA TM No. 1150, June 1947.
- Weise, A.: The Separation of Flow Due to Compressibility Shock. NACA TM No. 1152, July 1947.
- Heybey: Analytic Treatment of Normal Condensation Shock. NACA TM No. 1174, July 1947.

## Supersonic Flow

- Prandtl, L.: General Considerations on the Flow of Compressible Fluids. NACA TM No. 805, October 1936.
- Donaldson, Coleman duP.: Effects of Interaction between Normal Shock and Boundary Layer. NACA CB No. 4A27, January 1944.
- Ferri, Antonio: Application of the Method of Characteristics to Supersonic Rotational Flow. NACA TN No. 1135, September 1946.
- Bergman, Stefan: On Supersonic and Partially Supersonic Flow. NACA TN No. 1096, December 1946.
- Sauer, R.: Method of Characteristics for Three-Dimensional Axially Symmetrical Supersonic Flows. NACA TM No. 1133, January 1947.
- Busemann, A.: Infinitesimal Conical Supersonic Flow. NACA TM No. 1100, March 1947.
- Kantrowitz, Arthur: The Formation and Stability of Normal Shock Waves in Channel Flows. NACA TN No. 1225, March 1947.

## Laminar and Turbulent Flow (Continued)

- Liepmann, Hans W.: Investigation of Boundary-Layer Transition on Concave Walls. NACA ACR No. 4J28, February 1945.
- Ackeret, J., Feldmann, F., and Rott, N.: Investigations of Compression Shocks and Boundary Layers in Gases Moving at High Speed. NACA TM No. 1113, January 1947.
- Dryden, Hugh L.: Some Recent Contributions to the Study of Transition and Turbulent Boundary Layers. NACA TN No. 1168, April 1947.
- Liepmann, Hans W., and Fila, Gertrude H.: Investigations of Effects of Surface Temperature and Single Roughness Elements on Boundary-Layer Transition. NACA TN No. 1196, April 1947.
- Allen, H. Julian, and Nitzberg, Gerald E.: The Effect of Compressibility on the Growth of the Transonic Boundary Layer on Low-Drag Wings and Bodies. NACA TN No. 1255, April 1947.
- Smith, Newell H.: Exploratory Investigation of Laminar-Boundary-Layer Oscillations on a Rotating Disk. NACA TN No. 1227, May 1947.
- Ulrich, A.: Theoretical Investigation of Drag Reduction in Maintaining the Laminar Boundary Layer by Suction. NACA TM No. 1121, June 1947.
- Pierpont, P. Kenneth: Investigation of Suction-Slot Shapes for Controlling a Turbulent Boundary Layer. NACA TN No. 1292, June 1947.
- Eggink: Compression Shocks of Detached Flow. NACA TM No. 1150, June 1947.
- Lees, Lester: The Stability of the Laminar Boundary Layer in a Compressible Fluid. NACA TN No. 1360, July 1947.
- Tetervin, Neal: A Review of Boundary-Layer Literature. NACA TN No. 1384, July 1947.
- Pfenniger, Werner: Investigations on Reductions of Friction on Wings, in Particular by Means of Boundary Layer Suction. NACA TM No. 1181, August 1947.
- Tetervin, Neal: Boundary-Layer Momentum Equations for Three-Dimensional Flow. NACA TN No. 1479, October 1947.

## Jet Mixing

- Corrsin, Stanley: Investigation of Flow in an Axially Symmetrical Heated Jet of Air. NACA ACR No. 3L23, December 1943.

## Jet Mixing (Continued)

Corrsin, Stanley: Investigation of the Behavior of Parallel Two-Dimensional Air Jets. NACA ACR No. 4H24, November 1944.

Liepmann, Hans W., and Laufer, John: Investigation of Free Turbulent Mixing. NACA TN No. 1257, August 1947.

## AERODYNAMICS WITH HEAT

## Heat Transfer

Crocco, Luigi: Transmission of Heat from a Flat Plate to a Fluid Flowing at a High Velocity. NACA TM No. 690, October 1932.

Pinkel, Benjamin: Heat-Transfer Processes in Air-Cooled Engine Cylinders. NACA Report No. 612, 1938.

Frankl, F., and Voishel, V.: Heat Transfer in the Turbulent Boundary Layer of a Compressible Gas at High Speeds, by F. Frankl; and Friction in the Turbulent Boundary Layer of a Compressible Gas at High Speeds, by F. Frankl and V. Voishel. NACA TN No. 1032, October 1942.

Reichardt, H.: Heat Transfer through Turbulent Friction Layers. NACA TM No. 1047, September 1943.

Wood, George P.: Use of Stagnation Temperature in Calculating Rate of Heat Transfer in Aircraft Heat Exchangers. NACA RB No. 3J30, October 1943.

Nielsen, Jack N.: High-Altitude Cooling. Part III - Radiators. NACA ARR, September 1944.

Williams, David T.: High-Altitude Cooling. Part II - Air-Cooled Engines. NACA ARR, September 1944.

Liepmann, Hans W., and Fila, Gertrude H.: Investigations of Effects of Surface Temperature and Single Roughness Elements on Boundary-Layer Transition. NACA TN No. 1196, April 1947.

Lees, Lester: The Stability of the Laminar Boundary Layer in a Compressible Fluid. NACA TN No. 1360, July 1947.

Ellerbrock, H. H., Jr., Weislo, C. R., and Dexter, H. E.: Analysis, Verification, and Application of Equations and Procedures for the Design of Exhaust-Pipe Shrouds. NACA TN No. 1495, December 1947.
